It has come to our attention that various international organizations or individuals have been offering false employment opportunities at Aecon Group Inc. Aecon Group Inc. employment policies and processes involve interviews, and candidates who seek employment are never required to pay us any sum of money. To do so would be contrary to our business conduct guidelines and ethical practices. We also do not extend formal offers of employment or execute employment agreements through social media or social chat platforms.

We take this matter extremely seriously and are working with the appropriate authorities to shut down such fraudulent schemes. Please remain vigilant on this matter and report any suspicious outreach to your local authorities and email any concerns to aecon@aecon.com

Date: Jan 23, 2026

Location: Toronto, ON, CA

Operating Sector: Information Services

Position Title: Jr. Analyst, Security Operations

Come Build Your Career at Aecon!

As a Canadian leader in infrastructure development, Aecon is **safely** and **sustainably** building what matters for future generations to thrive! We lead some of the most impactful infrastructure **projects** of our generation, at the forefront of transformational change in transportation and energy, and partnering every day to build, connect, power, and strengthen our communities.

At Aecon, you can count on:

- **Safety Always.** Our number one core value. If we can't do it safely, we don't do it at all.

- **Integrity.** We lead by example, with humility and courage.
- **Accountability.** We're passionate about delivering on our commitments.
- **Inclusion.** We provide equitable opportunities for everyone.

We lead the infrastructure industry with purpose, and our **people** are at the heart of everything we do. So, we invest in our people, just like they invest in us!

At Aecon we:

- Ensure you and your family receive the services needed to **support your mental, emotional, and physical well-being.**
- Believe in helping you build your career through our **Aecon University and Leadership Programs.**
- Are committed to supporting and investing in inclusive work environments, through initiatives like Equity, Diversity & Inclusion training, our **Aecon Women in Trades and Aecon Diversity in Trades programs**, and our **Employee Resource Groups (ERGs)** to ensure we are building inclusion into every aspect of our culture at Aecon.
- Are a **leader in sustainable construction.** With a strong commitment to operating responsibly by **minimizing our impact** on the environment and surrounding communities.

Our business success relies on strong execution and continuous improvement – driven by the diversity, expertise and teamwork of our people. We're always searching the globe for innovative, collaborative minds to join our best-in-class Aecon community!

What is the Opportunity?

Reporting to the Sr. Manager, Security Architecture and Operations, the Jr. Security Analyst plays a key role in supporting daily security operations and advancing our information security roadmap. You'll balance priorities across multiple security functions, contribute strong documentation and analytical skills, and take initiative to identify and address needs.

What You'll Do Here:

- Support the day-to-day operations of the information security program.
- Monitor multiple environments to detect, validate and respond to anomalous activity, security events, or unauthorized access of information assets.

- Work to promptly resolve tickets related to information security, such as virus/malware infections on desktop, phishing, suspicious network traffic and vendor account reviews.
- Responsible for conducting vulnerability scans and coordinating all vulnerability remediation from any source (e.g. SAST/DAST scans, network scans, pen tests, etc.)
- Actively seek mitigation or closure in identified security risks and gaps.
- Track security trends/events to provide information on monthly security reporting.
- Utilize problem solving to find root cause in security incidents.
- Work collaboratively with other Information Services teams to reach common resolutions and goals.
- Provide technical support in the areas of vulnerability assessment, risk assessment, network security, product evaluation, incident management and security tool implementation.
- Conduct security product evaluations, and recommend products, technologies and upgrades to improve Aecon's security posture.
- Liaise with security product and service vendors to provide day to day support and monitoring of all networks.
- Work with our internal Communications and Learning teams to provide security awareness and training materials for a wide range of audiences, which ranges from senior leaders to field staff.
- Provide management of regular phishing simulations including, but not limited to, selection of templates, launching of campaigns and providing reporting & enforcement of compliance with phishing related policies.
- Monitor, triage and respond to emails that have been reported by employees as suspicious and potential phishing attacks. Provide monthly metrics related to these reported emails.
- Support the operational components of incident management, including detection, response, and reporting.
- Provide 24/7 oversight to security operations as it relates to monitoring and alerting of potential security incidents. Be available at any time to actively manage security incidents once they are confirmed by the Security Operations team.

What You Bring to the Team:

- A Bachelor's degree in Information Systems, Information Security or related field.

- 1-2 years' experience applying information security principles and practices in an enterprise environment, or 1-3 years of experience supporting information technology.
- Knowledge of security technologies and tools such as SIEM, IPS, EDR, MDM, web content filters and email security gateways
- A good understanding of the business impact of security tools, technologies and policies.
- Knowledge of Windows and Linux operating systems, and network protocols.
- Working towards CISSP and/or Security+ certifications would be an asset.
- Experience troubleshooting technical issues, with excellent analytical and problem-solving skills.
- An ability to manage multiple tasks with minimal supervision.
- Excellent reporting skills, with demonstrated ability to create reports.
- Strong verbal, written and interpersonal communication skills.

Reason for vacancy: Replacement

The expected salary range for this opportunity is \$62,000-\$70,000

Aecon fosters diversity, inclusion and belonging within and across our organization. We welcome all to apply including, women, visible minorities, Indigenous peoples, persons with disabilities, and persons of any sexual orientation or gender identity.

We are committed to adhering to the objectives and requirements outlined in the Accessible Canada Act (ACA), and to meeting the accessibility needs of persons with disabilities in a timely manner. Through the implementation of the requirements of the ACA and its applicable regulations, appropriate accommodations will be provided upon request throughout the interview and hiring process.

As part of our commitment to fair and transparent hiring practices, Aecon may use artificial intelligence (AI) tools to assist in screening and reviewing candidates. These tools are applied responsibly and in accordance with applicable privacy laws and Aecon's AI Usage Policy. All final decisions are made by qualified Aecon team members.
