

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience supporting day-to-day information security operations, including monitoring, alert triage, incident response support, and security event investigation in enterprise environments.
- Hands-on experience monitoring multiple environments to detect, validate, and respond to anomalous activity, unauthorized access, phishing, malware, and suspicious network traffic.
- Strong experience supporting vulnerability management activities, including reviewing scan results (SAST, DAST, network scans, and pen tests), tracking remediation, and validating closure of security findings.
- Experience resolving information security tickets related to endpoint infections, phishing reports, access reviews, and vendor account assessments.
- Proficient in supporting incident management processes, including detection, investigation, root cause analysis, response coordination, and reporting.
- Working knowledge of security technologies including SIEM, EDR/AV, email security, network security controls, and endpoint protection platforms.
- Experience collaborating with IT, infrastructure, and service teams to remediate security risks and improve overall security posture.
- Skilled in producing clear security reports, metrics, and documentation, including monthly security trend reporting and incident summaries.
- Strong understanding of Windows and Linux environments, network protocols, and the business impact of security controls and policies.
- Detail-oriented, process-driven security professional with strong problem-solving, time management, and communication skills.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA
NPower Canada | Toronto, Ontario

03/2026

Career Essentials in Cyber Security
Microsoft and LinkedIn

03/2026

Certified Information Systems Auditor **(CISA)**

01/2025

ISACA

Certified In Cybersecurity

06/2023

ISC2

Graduate Certificate in Cybersecurity and Threat Management

04/2023

Seneca Polytechnic | Toronto, Ontario

Bachelors in Computer Science

08/2016

Federal University of Petroleum Resources | Effurun, Delta State

Professional Experience

Applications Security & Field Services Technician

08/2023 – 08/2025

Accenture | Toronto, Ontario

- Supported the day-to-day operations of the information security program, ensuring continuous monitoring and response to security events across enterprise environments.
- Monitored and triaged security alerts to detect, validate, and respond to anomalous activity, malware infections, phishing attempts, and unauthorized access.
- Resolved information security tickets related to endpoint security, suspicious emails, access reviews, and vendor account assessments.
- Worked with SIEM tools (Microsoft Sentinel) to analyze logs, investigate security events, and support incident detection and reporting.
- Supported incident response activities, including evidence collection, log analysis, root cause investigation, and post-incident reporting.
- Assisted with vulnerability assessment and remediation coordination, reviewing scan results, pen test findings, and tracking mitigation activities to closure.
- Actively tracked security risks and gaps, collaborating with IT and infrastructure teams to reduce exposure and improve security controls.
- Reviewed reported phishing emails and suspicious activity, escalating confirmed threats and contributing to monthly phishing and security metrics.
- Conducted access control and vendor account reviews, validating permissions and adherence to security policies.
- Collaborated with internal teams and external vendors to resolve security issues and maintain operational security effectiveness.
- Produced clear incident, vulnerability, and security operations documentation to support reporting, audits, and continuous improvement.

Cloud Engineer

07/2019 – 08/2022

Findworka Solutions Limited | Remote, Lagos

- Supported **cloud security operations** within AWS environments, focusing on monitoring, logging, IAM, and secure configuration management.
- Reviewed **CloudTrail logs, system logs, and security alerts** to identify anomalous behavior and support incident response efforts.
- Assisted in troubleshooting **security and infrastructure incidents**, providing technical analysis and remediation support.
- Supported **vulnerability assessments** by identifying misconfigurations, outdated components, and security gaps within cloud workloads.
- Worked with network security controls, firewall rules, and access policies to enforce least privilege and reduce risk exposure.
- Provided technical support during **security incidents**, supplying logs, system context, and validation of corrective actions.

- Produced documentation and evidence artifacts to support **security reporting, audits, and risk assessments**.
- Collaborated with cross-functional teams to implement security improvements and operational best practices.
