

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in cybersecurity, cloud engineering, and security operations with strong capabilities in threat detection, alert investigation, and incident response
- Experienced in investigating and responding to alerts from SIEM, EDR, and cloud-native logging platforms, correlating identity, endpoint, network, and cloud telemetry to identify malicious activity
- Skilled in building, tuning, and maintaining detection logic using KQL, SQL, and regular expressions to improve alert fidelity and reduce false positives
- Hands-on experience supporting vulnerability management processes, validating findings, prioritizing remediation, and tracking closure evidence for compliance programs
- Strong understanding of IAM, endpoint security, DNS protections, firewall monitoring, and cloud logging within AWS and Azure environments
- Contributed to threat modeling exercises, detection gap analysis, and security control validation aligned with ISO 27001, SOC 2, and NIST frameworks
- Adept at developing investigation playbooks, response templates, and documentation to standardize workflows and improve SOC efficiency
- Experienced working in fast-paced environments requiring structured triage, analytical thinking, and collaboration across IT, DevOps, and engineering teams

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity	06/2023

Graduate Certificate in Cybersecurity and Threat Management
Seneca Polytechnic | Toronto, Ontario

04/2023

Bachelors in Computer Science
Federal University of Petroleum Resources | Effurun, Delta State

08/2016

Professional Experience

Applications Security & Field Services Technician

08/2023 –08/2025

Accenture | Toronto, Ontario

- Investigated and responded to security alerts generated from SIEM, EDR, and cloud-native logging systems, performing correlation across identity, endpoint, network, and cloud data sources
- Built and tuned detection queries using KQL and regex to improve alert quality, reduce false positives, and enhance detection coverage
- Conducted structured triage and impact assessments for security events, escalating confirmed incidents and supporting remediation efforts
- Collaborated with IT and DevOps teams to validate vulnerability findings, prioritize remediation, and track evidence for compliance closure
- Participated in threat modeling exercises and security risk assessments to identify detection gaps and strengthen preventative controls
- Contributed to documentation of investigation playbooks, detection logic, and response procedures to standardize workflows
- Assisted with ISO 27001 and SOC 2 evidence collection by validating control implementation and maintaining audit-ready documentation
- Tuned endpoint and cloud security configurations based on emerging threat intelligence and Indicators of Compromise

Cloud Engineer

07/2019 – 08/2022

Findworka Solutions Limited | Remote, Lagos

- Monitored AWS infrastructure logs including CloudTrail, IAM, and application logs to identify suspicious activities and misconfigurations.
- Correlated authentication events, network activity, and application telemetry to detect anomalous behavior across hybrid cloud environments.
- Implemented logging and monitoring improvements to enhance visibility across cloud workloads and reduce blind spots.
- Automated repetitive monitoring and validation tasks using Python and PowerShell scripts to improve operational efficiency.
- Supported vulnerability management processes by validating cloud configuration findings and assisting with remediation tracking.
- Collaborated with engineering teams to strengthen IAM controls, enforce least privilege access, and improve cloud security posture.
- Contributed to secure architecture reviews and risk assessments aligned with industry best practices.
