

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in technology operations, cybersecurity, and cloud infrastructure, with strong capabilities in monitoring, incident response, and system reliability.
- Skilled in monitoring application and infrastructure health, performing triage, and resolving incidents in a 24x7 operational environment using tools such as ServiceNow, Jira and Splunk.
- Experienced in documenting incidents, troubleshooting steps, and resolutions in clear, concise formats to support knowledge sharing and process improvement.
- Proficient in supporting Incident, Change, Release, and Problem management processes while adhering to IT and security best practices.
- Adept at identifying repeat or chronic issues and implementing automation or process improvements to reduce manual intervention and improve operational efficiency.
- Strong analytical, problem-solving, and communication skills, able to collaborate across technical and non-technical teams to ensure timely resolution of issues.
- Hands-on experience supporting Windows, Linux, Mac, and cloud environments with a focus on proactive monitoring, uptime optimization, and incident mitigation.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript, Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023

Graduate Certificate in Cybersecurity and Threat Management

04/2023

Seneca Polytechnic | Toronto, Ontario

Bachelors in Computer Science

08/2016

Federal University of Petroleum Resources | Effurun, Delta State

Professional Experience

Applications Security & Field Services Technician

08/2023 – 08/2025

Accenture | Toronto, Ontario

- Monitored applications and infrastructure health to identify potential issues proactively, reducing unplanned downtime and improving operational efficiency.
- Responded promptly to incidents and outages, performing triage, impact assessment, and escalation to Level 2 support teams as needed
- Investigated events and alerts from Splunk, Microsoft Sentinel, and other monitoring tools, documenting findings and mitigation steps to support continuous improvement
- Collaborated with cross-functional teams to resolve complex technical issues, applying problem-solving and root-cause analysis skills
- Developed and maintained playbooks, knowledge base articles, and process documentation for recurring incidents and standard operating procedures
- Participated in Incident, Change, Release, and Problem management processes, ensuring proper tracking, reporting, and resolution of IT issues
- Identified repetitive tasks and implemented automation solutions using PowerShell and Python scripts to reduce manual effort and improve efficiency.

Cloud Engineer

07/2019 – 08/2022

Findworka Solutions Limited | Remote, Lagos

- Monitored cloud infrastructure and applications to detect performance or security issues, escalating incidents when required to maintain uptime
- Conducted initial triage, investigated alerts, and performed technical recovery procedures for end-users and enterprise systems
- Managed user accounts, provisioning hardware, and configuring software environments to support secure and stable operations
- Documented incidents, troubleshooting steps, and resolutions to improve knowledge sharing and support team effectiveness
- Participated in projects to improve cloud monitoring, automate repetitive tasks, and implement process improvements for IT and security operations
