

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in cybersecurity, cloud engineering, and technical support, with strong capabilities in monitoring, analysis, and incident response.
- Skilled in detecting, investigating, and escalating security events using tools such as Splunk, Wireshark, Autopsy, EnCase, and AWS (EC2, IAM, S3, RDS, CloudFront, Route 53, Application Load Balancers, ElastiCache).
- Hands-on experience with intrusion detection/prevention, vulnerability assessments, and applying security controls across cloud and hybrid environments.
- Proven ability to analyze logs, network traffic, and system behaviors to identify anomalies, potential threats, and indicators of compromise.
- Experienced supporting cloud infrastructure security, improving system reliability, automating tasks, and reducing attack surfaces through hardening.
- Resolved complex security and technical issues through structured incident investigations and root-cause analysis aligned with NIST CSF (Detect, Respond, Recover), contributing to continuous improvement in operational security processes.
- Participated in security architecture reviews and risk assessments mapped to NIST SP 800-30 and NIST SP 800-53, providing actionable recommendations to improve system performance, cost efficiency, and overall risk posture.
- Collaborated effectively with cross-functional teams (engineering, operations, and stakeholders) to communicate security findings clearly, balance risk with business needs, and support timely decision-making.

Tech Stack & Skills

Languages:

SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript, Splunk, Wireshark, Autopsy, Encase and AWS KMS

Operating Systems:

Windows, Android, iOS, Mac OS, Linux

Security Tools:

Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel

Applications & Tools:

Microsoft Excel, Azure Sandbox

AI Fundamentals:

Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)

Project Management Fundamentals:

Agile, Waterfall, Scrum, Kanban, Trello

Skills:

Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023
Graduate Certificate in Cybersecurity and Threat Management Seneca Polytechnic Toronto, Ontario	04/2023
Bachelors in Computer Science Federal University of Petroleum Resources Effurun, Delta State	08/2016

Professional Experience

Applications Security & Field Services Technician Accenture Toronto, Ontario	08/2023 – 08/2025
- Delivered cybersecurity awareness guidance and short training sessions to staff, helping improve everyday security practices and reduce user-driven risk. - Prepared clear documentation and reports for security incidents, audits, and risk reviews, supporting internal reviews and compliance requirements. - Contributed to risk assessments aligned with NIST standards, documenting control gaps and recommending practical improvements that balanced security needs with operational realities. - Worked closely with infrastructure and application teams to review security controls and support the implementation of protections such as endpoint security, encryption, and monitoring tools. - Helped develop, update, and enforce security policies and procedures, ensuring access controls and authentication practices were applied consistently for employees and third-party users. - Supported vulnerability assessments by reviewing findings, validating risks, and helping prioritize remediation efforts based on likelihood and impact. - Investigated security incidents from initial alert through resolution, performing root cause analysis and working with IT teams to contain issues and prevent recurrence. - Monitored security alerts and system activity across cloud and enterprise environments, reviewing logs and network traffic to spot suspicious behavior and potential threats early. - Stayed current on emerging threats and attack trends, using this knowledge to support timely security guidance and improve detection and response processes.	
Cloud Engineer Findworka Solutions Limited Remote, Lagos	07/2019 – 08/2022
- Created and optimized cloud and cloud adjacent processes to ensure world-class customer success and delight. - Designed and improved cloud and cloud-adjacent processes, leading to more reliable deployments, faster issue resolution, and a smoother experience for internal teams and customers. - Built and hosted production workloads on AWS using services such as IAM, EC2, S3, RDS, CloudFront, ECS, and CloudWatch, improving system resilience and simplifying infrastructure management. - Collaborated with cross-functional development teams to evaluate solution options against evolving requirements, helping deliver secure, scalable systems that aligned with business goals.	

- Automated database migration from MySQL to Amazon RDS for PostgreSQL, improving database performance, reliability, and long-term maintainability.
- Containerized and orchestrated application workloads using Docker, ECS, and ECR, simplifying deployments and improving consistency across environments.
- Implemented infrastructure automation and CI/CD pipelines with Shell scripting, Terraform, GitHub Actions, and CloudWatch, reducing manual effort and improving deployment speed and visibility.
- Helped migrate the old system from In-House/On-Premise servers to AWS cloud servers.
- Collaborated with cross-functional development team members to analyze potential system solutions based on evolving client requirements.
