

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in cybersecurity, security operations, cloud engineering, and risk management, supporting enterprise environments with a focus on incident detection, response, and compliance alignment.
- Experienced in monitoring, investigating, and responding to security alerts using SIEM and EDR platforms including Microsoft Sentinel, Defender suite, Splunk, and AWS CloudWatch, with hands-on log analysis and threat detection capabilities.
- Strong background in security operations and incident response, conducting root cause analysis, developing remediation plans, and aligning activities with NIST CSF (Detect, Respond, Recover) and industry best practices.
- Hands-on experience supporting SOC2, NIST, and ISO-aligned security programs through control testing, audit preparation, evidence collection, and policy development.
- Skilled in identity and access management (IAM), including privileged access controls, authentication management, and enforcing least-privilege principles across cloud and hybrid environments.
- Experienced in vulnerability management, risk assessments (NIST SP 800-30), and implementing security controls (NIST SP 800-53) to strengthen organizational risk posture.
- Proficient in analyzing network traffic, system logs, and endpoint telemetry using tools such as Splunk, Wireshark, Autopsy, EnCase, Microsoft Defender XDR, and AWS security services to identify anomalies and indicators of compromise.
- Effective collaborator with engineering, compliance, and business stakeholders, translating technical security findings into actionable risk insights while balancing operational and customer needs.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Security Operation & Monitoring:	Incident Response, Threat Hunting, Log Analysis, SIEM Monitoring, Alert triage, Root cause analysis, digital forensics.
Security compliance Framework:	SOC2, NIST CSF, NIST SP 800-53, ISO 27001 (aligned controls), PCI-DSS (exposure), HIPAA
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023
Graduate Certificate in Cybersecurity and Threat Management Seneca Polytechnic Toronto, Ontario	04/2023
Bachelors in Computer Science Federal University of Petroleum Resources Effurun, Delta State	08/2016

Professional Experience

Applications Security & Field Services Technician Accenture Toronto, Ontario	08/2023 – 08/2025
- Monitored and analyzed security logs, endpoint alerts, and authentication events to detect anomalous behavior and potential indicators of compromise using Microsoft Defender and Sentinel. - Participated in security incident investigations, performing log correlation, root-cause analysis, and documentation of findings aligned with NIST incident response lifecycle (Detect, Respond, Recover). - Developed and maintained security policies and operational procedures aligned with NIST CSF and ISO-aligned controls, improving audit readiness and governance maturity. - Supported SOC2-style audit preparation by organizing control documentation, maintaining evidence repositories, and validating implementation of access control and monitoring controls. - Conducted semi-quantitative risk assessments using NIST SP 800-30 to identify high-risk vulnerabilities and recommend remediation strategies. - Assisted with vulnerability assessments and control testing mapped to NIST SP 800-53 security controls. - Implemented identity governance improvements, strengthening MFA enforcement, role-based access control (RBAC), and privileged account monitoring within Entra ID. - Delivered targeted security awareness training sessions to technical and non-technical stakeholders, reducing phishing susceptibility and improving security hygiene. - Collaborated with engineering and operations teams to ensure new projects met established security standards before deployment.	
Cloud Engineer Findworka Solutions Limited Remote, Lagos	07/2019 – 08/2022
- Built and secured AWS cloud environments using IAM, EC2, S3, RDS, CloudFront, ECS, and CloudWatch, implementing least privilege access and encryption controls. - Monitored cloud workloads and system logs to detect misconfigurations, unusual access patterns, and performance anomalies. - Automated infrastructure deployments and security configurations using Terraform and CI/CD pipelines (GitHub Actions), reducing manual configuration risk. - Containerized applications using Docker and ECS, incorporating security best practices into deployment workflows. - Implemented database migration from MySQL to Amazon RDS PostgreSQL, improving availability, logging visibility, and backup resilience.	

- Assisted in migrating on-premise infrastructure to AWS cloud environments, strengthening perimeter security and reducing attack surface.
- Partnered with development teams to integrate secure coding and infrastructure best practices into deployment cycles (DevSecOps alignment).
