

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience supporting enterprise technology environments with a strong focus on technical troubleshooting, system support, and operational IT processes.
- Hands on experience diagnosing hardware, software, and system issues across Windows, Linux, and enterprise environments to support smooth IT operations.
- Experienced providing technical support to internal users by analyzing system issues, reviewing configurations, and assisting with system setup and maintenance.
- Strong background working with enterprise systems including identity platforms, endpoint devices, networking environments, and cloud services.
- Skilled in system setup, user access administration, documentation of technical procedures, and supporting onboarding and operational IT activities.
- Certifications focused professional (CISA, ISC2 CC) with strong problem solving, communication, and documentation skills.
- Detail oriented and service focused professional with experience supporting technical environments, troubleshooting system issues, and collaborating with cross functional teams.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023

Graduate Certificate in Cybersecurity and Threat Management

04/2023

Seneca Polytechnic | Toronto, Ontario

Bachelors in Computer Science

08/2016

Federal University of Petroleum Resources | Effurun, Delta State

Professional Experience

Applications Security & Field Services Technician

08/2023 –08/2025

Accenture | Toronto, Ontario

- Provided front line technical support by troubleshooting system issues related to enterprise applications, endpoint devices, and user access.
- Assisted users with diagnosing and resolving software, configuration, and access related issues across enterprise systems.
- Supported system setup and configuration activities including reviewing endpoint configurations, access permissions, and system settings.
- Conducted technical walkthroughs with stakeholders to understand system issues, review configurations, and assist with problem resolution.
- Assisted with monitoring system logs and alerts to identify potential issues affecting system availability and user access.
- Supported investigation of system incidents by reviewing logs, configurations, and user activity across enterprise environments.
- Documented troubleshooting procedures, system configurations, and investigation findings to support internal IT documentation.
- Collaborated with infrastructure, security, and operations teams to resolve system issues and improve operational processes.
- Maintained documentation and operational records supporting system maintenance, troubleshooting, and internal reviews.
- Assisted with configuration reviews and system checks to ensure stable and secure system operations.

Cloud Engineer

07/2019 – 08/2022

Findworka Solutions Limited | Remote, Lagos

- Supported cloud infrastructure environments by troubleshooting system issues and assisting with configuration of cloud services and infrastructure components.
- Assisted with system setup, access configuration, and monitoring of cloud environments supporting enterprise applications.
- Reviewed system logs and monitoring outputs to identify potential issues affecting system performance or availability.
- Participated in technical discussions with engineering teams to review system configurations and resolve infrastructure related issues.
- Assisted with documenting system configurations, operational procedures, and infrastructure architecture.
- Provided support for system maintenance activities and assisted with troubleshooting application or infrastructure issues.
- Supported operational monitoring of cloud workloads and infrastructure services.
- Provided technical documentation and operational artifacts supporting system maintenance and internal reviews.
