

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in cybersecurity, cloud engineering, and technical support, with strong capabilities in monitoring, analysis, and incident response.
- Skilled in detecting, investigating, and escalating security events using tools such as Splunk, Wireshark, Autopsy, EnCase, and AWS (EC2, IAM, S3, RDS, CloudFront, Route 53, Application Load Balancers, ElastiCache).
- Hands-on experience with intrusion detection/prevention, vulnerability assessments, and applying security controls across cloud and hybrid environments.
- Proven ability to analyze logs, network traffic, and system behaviors to identify anomalies, potential threats, and indicators of compromise.
- Experienced supporting cloud infrastructure security, improving system reliability, automating tasks, and reducing attack surfaces through hardening.
- Resolved complex security and technical issues through structured incident investigations and root-cause analysis aligned with NIST CSF (Detect, Respond, Recover), contributing to continuous improvement in operational security processes.
- Participated in security architecture reviews and risk assessments mapped to NIST SP 800-30 and NIST SP 800-53, providing actionable recommendations to improve system performance, cost efficiency, and overall risk posture.
- Collaborated effectively with cross-functional teams (engineering, operations, and stakeholders) to communicate security findings clearly, balance risk with business needs, and support timely decision-making.

Tech Stack & Skills

Languages:

SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript, Splunk, Wireshark, Autopsy, Encase and AWS KMS

Operating Systems:

Windows, Android, iOS, Mac OS, Linux

Security Tools:

Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel

Applications & Tools:

Microsoft Excel, Azure Sandbox

AI Fundamentals:

Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)

Project Management Fundamentals:

Agile, Waterfall, Scrum, Kanban, Trello

Skills:

Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023
Graduate Certificate in Cybersecurity and Threat Management Seneca Polytechnic Toronto, Ontario	04/2023
Bachelors in Computer Science Federal University of Petroleum Resources Effurun, Delta State	08/2016

Professional Experience

Applications Security & Field Services Technician Accenture Toronto, Ontario	08/2023 – 08/2025
- Monitored security alerts, logs, and system activity across enterprise and cloud environments to identify potential threats and suspicious behavior in real time. - Investigated security incidents end-to-end, from initial alert to resolution, performing root cause analysis and coordinating remediation with IT and engineering teams. - Supported vulnerability assessments by reviewing scan results, validating findings, and helping prioritize remediation based on risk and business impact. - Helped develop, update, and enforce security policies and procedures, including access control and authentication standards for internal users and third-party accounts. - Worked closely with infrastructure, application, and endpoint teams to review and improve security controls such as endpoint protection, monitoring, encryption, and identity controls. - Conducted cybersecurity risk assessments aligned with NIST frameworks, documenting control gaps and recommending practical improvements. - Supported audits and compliance reviews by gathering evidence, reviewing documentation, and validating selected security controls. - Prepared clear incident reports, risk documentation, and audit artifacts to support internal reviews and compliance requirements. - Delivered security awareness guidance and short training sessions to employees, helping improve day-to-day security practices and reduce user-related risk. - Kept up to date with emerging threats and attack trends, using this knowledge to support better detection, response, and prevention activities.	
Cloud Engineer Findworka Solutions Limited Remote, Lagos	07/2019 – 08/2022
- Designed, deployed, and supported cloud infrastructure on AWS, with a strong focus on availability, security, and performance. - Built and managed production workloads using AWS services such as IAM, EC2, S3, RDS, CloudFront, ECS, and CloudWatch. - Implemented access controls, network security configurations, and monitoring to reduce exposure and strengthen cloud security posture.	

- Supported secure migration of on-premise systems to AWS, helping move workloads safely while minimizing downtime and risk.
- Worked with development teams to review system designs, identify security risks, and recommend secure architecture and configuration options.
- Automated infrastructure tasks and deployments using shell scripting, Terraform, GitHub Actions, and CI/CD pipelines, reducing manual errors and improving consistency.
- Containerized applications using Docker and ECS/ECR to support secure, repeatable deployments across environments.
- Assisted with database migration from MySQL to Amazon RDS for PostgreSQL, improving reliability, performance, and maintainability.
- Monitored system health, logs, and alerts to identify issues early and support incident response and troubleshooting.
- Documented system configurations, processes, and security considerations to support operational support and knowledge transfer.
