

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in software testing, cybersecurity, and cloud engineering, with strong capabilities in exploratory testing, QA analysis, and issue resolution.
- Skilled in identifying, reproducing, and documenting bugs across web, desktop, and mobile applications, while verifying fixes and suggesting improvements to enhance user experience.
- Hands-on experience analyzing logs, SQL databases, and system behaviors to uncover root causes of complex issues.
- Experienced collaborating with product managers, developers, and designers to ensure software meets functional requirements and quality standards.
- Adept at tracking QA metrics, coordinating pre-release testing processes, and balancing test coverage with business priorities.
- Proven ability to improve QA processes through systematic testing, automation awareness, and clear documentation of issues and solutions.
- Strong analytical, logical, and quantitative skills with disciplined, methodical, and detail-oriented approach to software quality assurance.
- Quick learner with the technical aptitude to work across multiple technologies and environments, bridging QA, development, and operational teams.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Security Operation & Monitoring:	Incident Response, Threat Hunting, Log Analysis, SIEM Monitoring, Alert triage, Root cause analysis, digital forensics.
Security compliance Framework:	SOC2, NIST CSF, NIST SP 800-53, ISO 27001 (aligned controls), PCI-DSS (exposure), HIPAA
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA
NPower Canada | Toronto, Ontario

03/2026

Career Essentials in Cyber Security
Microsoft and LinkedIn

03/2026

Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023
Graduate Certificate in Cybersecurity and Threat Management Seneca Polytechnic Toronto, Ontario	04/2023
Bachelors in Computer Science Federal University of Petroleum Resources Effurun, Delta State	08/2016

Professional Experience

Applications Security & Field Services Technician Accenture Toronto, Ontario	08/2023 – 08/2025
- Performed exploratory testing on internal applications and APIs to identify anomalies, bugs, and system inconsistencies, ensuring high-quality releases. - Collaborated with developers, product managers, and stakeholders to clarify reported issues and verify bug fixes before deployment. - Investigated logs, API responses, and SQL databases to determine root causes of system defects and implement corrective measures. - Developed and maintained QA documentation and standard operating procedures to improve testing efficiency and reproducibility of results. - Participated in release management by providing QA feedback and recommendations on release readiness, including deferring releases when critical issues were identified. - Coordinated with cross-functional teams to improve QA processes, ensuring testing aligned with software lifecycle stages and security compliance requirements.	
Cloud Engineer Findworka Solutions Limited Remote, Lagos	07/2019 – 08/2022
- Supported pre-production and production environments by testing cloud-hosted applications for performance, stability, and functional accuracy. - Conducted root-cause analysis of system and application issues using logs, AWS CloudWatch, and database queries to resolve defects quickly. - Collaborated with development teams to integrate security, operational, and QA requirements into application deployments. - Created process documentation for testing workflows, bug tracking, and incident reporting to standardize QA practices across teams. - Assisted in validating software changes and enhancements, ensuring proper functionality and minimal disruption to end users. - Leveraged scripting and automation tools (Python, Shell) to streamline repetitive testing tasks and support QA efficiency.
