Information Security Analyst(Job Number: 26000959)

Primary Location : ON-Mississauga

Information Technology

Employee Type : Full-Time

Pay Rate From : \$68,900

Pay Rate To : \$86,100

Description :

Bayshore HealthCare is one of the Canada's leading providers of home and community health care services and is a privately owned company. Bayshore HealthCare is proud to showcase its achievement as a Platinum member of Canada's Best Managed Companies Program every year since 2006. Bayshore Healthcare is also recognized as Canada's Best Employers in Forbes 2023 list.

JOB SUMMARY

The Technical Security Analyst, under the direction of the Manager Information Security & Privacy assists with the planning and implementing of security measures to protect Bayshore's information computing systems and data that supports the company's Security program and objectives. The role's main activities include system monitoring, risk assessment, technical review of company initiatives and enhancements, policy review and development.

DUTIES AND RESPONSIBILITIES

- Support security operations by analyzing event data from multiple sources to detect unusual activities and swiftly address any security breaches or incidents. Carry out root cause analyses and implement necessary corrective measures.
- Evaluate and analyze vulnerability management reports, coordinating remediation efforts with relevant teams.
- Help maintain auditing programs to ensure compliance with Information Security policies.
- Update the risk register by conducting risk and impact assessments related to information security; collaborate with stakeholders and management to communicate risks and remediation actions.
- Oversee system security administration for designated technology platforms, which include operating systems, applications, and security systems.
- Manage the Security Exception Process to assist Security teams in tracking exceptions, managing approvals, and enhancing automation.
- Develop and implement security policies, procedures, and protocols to safeguard the organization's data and network infrastructures.
- Aid in Information System audit and compliance efforts.
- Conduct research and report on various technologies and current attack trends.
- Compile security operations metrics and provide updates to management team.
- Identify opportunities for process improvements or efficiency gains, which may involve creating tools, workflows, or playbooks to automate routine tasks for better security effectiveness.
- Assist the team in maintaining up-to-date documentation and drafting new procedures as

necessary.

- Lead Bayshore's Information Security & Privacy Awareness program.
- Engage in small to medium-sized projects to integrate information security and privacy requirements for proactive information protection.
- Coordinate web assessments and penetration testing with external vendors, followed by remediation efforts.
- Complete additional security-related tasks as assigned.
- Act as a backup for the Information Security Officer.
- Be available for overtime work outside regular business hours or on weekends when needed.

REPORTING RELATIONSHIPS

The Information Security Analyst reports directly to the Manager, Information Security & Privacy

Work Location : Bayshore Healthcare, National Office, Mississauga ON

Hybrid – At least 2 days onsite weekly
