

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Information Security Analyst with **5+ years of experience** supporting security operations, vulnerability management, risk assessments, and audit readiness across cloud and on-prem environments.
- Hands-on experience analyzing **security events, vulnerability reports, and incident data** to identify risks, perform root cause analysis, and drive remediation with technical teams.
- Strong background in **risk management, policy development, compliance support, and security documentation**, aligned with industry frameworks such as **NIST, ISO 27001, and CIS Controls**.
- Proven ability to collaborate with stakeholders, maintain **risk registers**, manage **security exceptions**, and report security metrics to leadership.
- Adept at improving security processes through **automation, playbooks, and workflow optimization**, while supporting security awareness initiatives and audit activities.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox, SAST, DAST, Secure Code Review, API Security, SSDLC
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity
API & Gateway Security:	REST, SOAP, GraphQL, gRPC, Apigee, Kong
Framework and Standards:	IOWASP ASVS, OWASP API top 10, NIST SP 800-53, ISO 27001
DevSecOps:	ICI/CD security integration, Agile methodologies, secure design pattern.
Threat Modelling & Appsec Tools:	IOWASP Threat Dragon,Burp Suite, OWASP ZAP, SonarQube

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025

Certified In Cybersecurity

06/2023

ISC2

Graduate Certificate in Cybersecurity and Threat Management

04/2023

Seneca Polytechnic | Toronto, Ontario

Bachelors in Computer Science

08/2016

Federal University of Petroleum Resources | Effurun, Delta State

Professional Experience

Applications Security & Field Services Technician

08/2023 –08/2025

Accenture | Toronto, Ontario

- Supported **security operations** by analyzing logs, alerts, and event data from multiple sources to identify unusual activity and assist in incident investigations and containment efforts.
- Performed **root cause analysis** on security incidents and recurring vulnerabilities, recommending corrective and preventive controls to reduce repeat findings.
- Reviewed **vulnerability management reports** from scanning tools and coordinated remediation activities with application, infrastructure, and cloud teams.
- Assisted in maintaining **audit readiness** by supporting internal security assessments, evidence collection, and alignment with Information Security policies and standards.
- Conducted **risk and impact assessments**, updating the risk register and collaborating with stakeholders to communicate risks, mitigation plans, and residual risk.
- Supported **system security administration** activities by reviewing configurations related to operating systems, applications, cloud services, and identity controls.
- Helped manage the **Security Exception process**, tracking approvals, documenting compensating controls, and identifying opportunities to improve exception handling workflows.
- Contributed to the **development and review of security policies, procedures, and standards** to safeguard organizational data and infrastructure.
- Coordinated security findings remediation following **application security testing and penetration testing**, ensuring issues were validated and properly closed.
- Compiled **security metrics and reports** to provide visibility into risk trends, vulnerability status, and remediation progress for management.
- Identified process improvement opportunities by creating **scripts, templates, and playbooks** to automate repetitive security tasks and improve operational efficiency.
- Maintained up-to-date **security documentation**, including procedures, assessment artifacts, and control descriptions.

Application Security Analyst

07/2019 – 08/2022

Findworka Solutions Limited | Remote, Lagos

- Supported day-to-day **information security operations**, assisting in monitoring, analyzing, and responding to application and infrastructure security issues.
- Conducted **risk assessments and impact analyses** for applications and systems, documenting findings and updating risk registers in collaboration with stakeholders.
- Evaluated results from **vulnerability scans and penetration tests**, working with development and infrastructure teams to prioritize and remediate risks.
- Assisted with **audit and compliance activities**, including preparation for internal reviews and external assessments aligned with ISO 27001, NIST, and PCI-DSS.
- Helped develop and maintain **security policies, standards, and procedures**, ensuring consistency with organizational security objectives and regulatory requirements.

- Supported **security awareness initiatives** by delivering guidance to technical teams on secure coding practices and common attack vectors.
- Coordinated with third-party vendors for **web application assessments and penetration testing**, tracking remediation efforts through closure.
- Researched emerging **attack trends, vulnerabilities, and security technologies**, sharing insights with the security team to strengthen defensive controls.
- Assisted in compiling **operational security metrics**, highlighting trends in vulnerabilities, incidents, and remediation timelines.
- Participated in small to medium-sized security projects to integrate **security and privacy requirements** into new systems and processes.
