

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in cybersecurity, governance, risk, and compliance, with a strong focus on security control assessment, control testing, and risk evaluation within regulated environments.
- Hands-on experience performing security and control assessments, walkthroughs, and evidence-based testing aligned with compliance, audit, and privacy requirements.
- Strong background supporting financial services and enterprise environments, assessing controls across networking, application security, databases, identity, and cloud platforms.
- Experienced in participating in security review discussions and assessment workshops with stakeholders to validate control effectiveness and document gaps.
- Skilled in supporting compliance and audit activities aligned with frameworks and standards such as ISO 27002, PCI DSS (exposure), and NIST, with working knowledge of SWIFT CSP concepts.
- Certifications-focused professional (CISA, ISC2 CC) with strong documentation, communication, and stakeholder engagement skills.
- Detail-oriented, process-driven, and effective at executing control testing activities without involvement in control design.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA NPower Canada Toronto, Ontario	03/2026
Career Essentials in Cyber Security Microsoft and LinkedIn	03/2026
Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023

Graduate Certificate in Cybersecurity and Threat Management

Seneca Polytechnic | Toronto, Ontario

04/2023

Bachelors in Computer Science

Federal University of Petroleum Resources | Effurun, Delta State

08/2016

Professional Experience

Applications Security & Field Services Technician

08/2023 – 08/2025

Accenture | Toronto, Ontario

- Supported Security Operations and Incident Management activities within enterprise and financial services environments by monitoring security controls, reviewing alerts, and validating security events across endpoint, identity, application, and cloud platforms.
- Worked with SIEM platforms (Microsoft Sentinel) to analyze security logs, discriminate relevant security events, and support detection and investigation of suspicious activity.
- Assisted in incident investigations and response activities, including evidence collection, log review, access validation, and post-incident documentation to support recovery and audit readiness.
- Conducted access control reviews across applications, cloud resources, and identity platforms; validated user entitlements, privileged access, and segregation of duties, producing audit-ready reports.
- Reviewed endpoint security controls and telemetry (EDR/AV concepts) to validate alerting, logging, and response effectiveness, supporting containment and remediation workflows.
- Supported cloud security operations by reviewing AWS and Azure security configurations, logging (CloudTrail-equivalent concepts), monitoring controls, and security findings aligned to organizational standards.
- Assisted with security data analysis and log validation, ensuring relevant security events were properly captured, retained, and usable for investigations and compliance purposes.
- Participated in alert coordination activities, collaborating with internal technology teams and external service providers to ensure security findings were investigated and resolved.
- Supported audit, penetration test, and compliance remediation efforts, validating corrective actions, retesting controls, and tracking remediation evidence.
- Maintained detailed incident, assessment, and operational documentation, contributing to process improvement, SOP updates, and security knowledge sharing.
- Applied strong time management and prioritization skills to handle multiple security tasks concurrently under minimal supervision in fast-paced environments.

Cloud Engineer

07/2019 – 08/2022

Findworka Solutions Limited | Remote, Lagos

- Supported cloud security operations in AWS environments, assisting with monitoring, logging, and security configuration reviews to protect cloud workloads.
- Worked with AWS security services and concepts including logging, monitoring, IAM, MFA, and network security controls to support threat detection and incident investigation.
- Assisted in reviewing CloudTrail logs, access activity, and security alerts to identify anomalous behavior and support security investigations.
- Supported incident response activities by providing technical context, system logs, and infrastructure details during security investigations and recovery efforts.
- Assisted in maintaining secure cloud configurations using infrastructure-as-code principles and documented configurations to support auditability and repeatability.
- Collaborated with security, risk, and audit stakeholders during walkthroughs and tabletop discussions, explaining cloud architectures and security control implementation.
- Supported access management reviews, validating user access, role assignments, and permission changes across cloud platforms.

- Provided security documentation, diagrams, and evidence artifacts for audits, penetration tests, and compliance assessments.
- Gained hands-on exposure to cloud-native threat detection, security monitoring, and operational security workflows in production environments.
