

Victor A Monday

Toronto, Ontario | 437 260 7216 | monday.akubudike@outlook.com | [LinkedIn](#)

Professional Summary

- Over 5 years of experience in IT systems support, cybersecurity, and cloud engineering, with strong capabilities in infrastructure administration, troubleshooting, and operational security.
- Experienced supporting and maintaining enterprise IT systems, ensuring scalability, performance optimization, and secure configuration across cloud and hybrid environments.
- Skilled in diagnosing and resolving complex end-user and system-level technical issues using structured problem-solving and root-cause analysis techniques.
- Hands-on experience installing, configuring, testing, documenting, and supporting enterprise applications and business-critical systems.
- Proven ability to apply industry best practices to improve system reliability, enforce governance controls, and maintain compliance with internal IT policies and standards.
- Utilized scripting and automation tools including PowerShell, Python, and Terraform to streamline operational processes and reduce manual effort.
- Contributed to IT initiatives focused on improving operational efficiency, system stability, and security posture across infrastructure environments.
- Collaborated effectively with cross-functional stakeholders to support business systems, including ERP-integrated environments, while balancing technical and operational requirements.

Tech Stack & Skills

Languages:	SQL, Python, Kusto Query Language (KQL), PowerShell Scripting, JavaScript , Splunk, Wireshark, Autopsy, Encase and AWS KMS
Operating Systems:	Windows, Android, iOS, Mac OS, Linux
Security Tools:	Microsoft Defender suite (including Defender for Office 365, Cloud Apps, Purview, Endpoint, Identity), Microsoft Sentinel
Applications & Tools:	Microsoft Excel, Azure Sandbox
AI Fundamentals:	Prompt Engineering & Output Evaluation, Creating responsible generative AI solutions, Microsoft Security Copilot (Copilot in Defender XDR, Purview, Entra, Intune and Cloud)
Project Management Fundamentals:	Agile, Waterfall, Scrum, Kanban, Trello
Security Operation & Monitoring:	Incident Response, Threat Hunting, Log Analysis, SIEM Monitoring, Alert triage, Root cause analysis, digital forensics.
Security compliance Framework:	SOC2, NIST CSF, NIST SP 800-53, ISO 27001 (aligned controls), PCI-DSS (exposure), HIPAA
Skills:	Information security, Malware Analysis, Network Monitoring, Threat Detection, Incident Response, Time Management, Problem Solving, Teamwork and Creativity

Education & Certifications

Security Operations Analyst Program: Microsoft Certified SOA
NPower Canada | Toronto, Ontario

03/2026

Career Essentials in Cyber Security
Microsoft and LinkedIn

03/2026

Certified Information Systems Auditor (CISA) ISACA	01/2025
Certified In Cybersecurity ISC2	06/2023
Graduate Certificate in Cybersecurity and Threat Management Seneca Polytechnic Toronto, Ontario	04/2023
Bachelors in Computer Science Federal University of Petroleum Resources Effurun, Delta State	08/2016

Professional Experience

Applications Security & Field Services Technician Accenture Toronto, Ontario	08/2023 – 08/2025
- Supported and administered enterprise IT systems and security environments, ensuring systems remained secure, stable, and aligned with organizational standards. - Troubleshoot and resolved end-user technical issues across operating systems, enterprise applications, and security platforms, applying structured root-cause analysis to prevent recurrence. - Installed, configured, tested, and documented enterprise systems and applications, ensuring proper integration within existing infrastructure. - Enforced IT policies, access controls, and governance standards to ensure secure and compliant use of technology resources. - Assisted with internal audits and compliance reviews by preparing documentation, validating control implementation, and supporting evidence collection. - Contributed to operational improvement initiatives that enhanced system reliability and reduced recurring technical issues. - Automated routine administrative tasks using PowerShell scripting to streamline system maintenance and reduce manual workload. - Worked closely with business stakeholders and IT teams to support system enhancements and maintain operational continuity across business platforms.	
Cloud Engineer Findworka Solutions Limited Remote, Lagos	07/2019 – 08/2022
- Deployed, maintained, and supported cloud-hosted enterprise applications and infrastructure components to ensure high availability and performance. - Administered virtual servers and business-critical systems within AWS, applying security best practices and performance optimization techniques. - Monitored infrastructure health and system metrics using CloudWatch, proactively identifying and resolving performance bottlenecks. - Migrated legacy systems to cloud-based environments, improving scalability, resilience, and maintainability of core business applications. - Implemented infrastructure automation using Terraform and scripting tools to reduce configuration drift and improve deployment consistency. - Collaborated with cross-functional development and operations teams to evaluate system requirements and ensure secure, scalable implementation of business solutions. - Supported ERP-integrated workloads by ensuring database availability, secure access management, and reliable backend infrastructure operations.
